DETAILED ACTION

1. This application has been examined. An informational disclosure statement (IDS) filed February 25, 2004, has been considered. Claims 1-7 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation of "...formed by etching or formed by net..." fails to distinctly claim the invention. The term etching is a method limitation and net is believed to be a type of filter (i.e., a net filter).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, 5, as presently understood, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by figure 5 of Pilolla. Note the filter 86 disposed in the groove of the valve body. A snap ring 40 is shown in detail in Figure 5A. With regard to claim 5 the filter of Pilolla is readable on a "net filter".

Art Unit: 3753

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In particular note filter 54 of Wanner et al. Giles shows a cylindrical filter on the outer portion of the spool valve. Note Figure 2 of Ichihashi et al.
